## Introduction

### Purpose

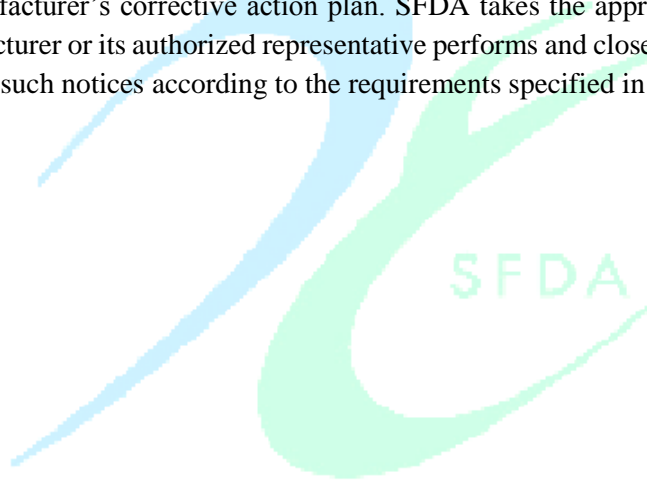

The purpose of this guidance is to clarify the requirements for following up and closing medical devices field safety notices (FSNs)

### Scope

This guidance applies to local manufacturers and authorized representatives (ARs) related to medical devices FSNs.

### Background

In accordance with the "Medical Devices Interim Regulation" issued by the Board of Directors of the Food and Drug Authority (1-8-1429) dated 29/12/1429 H, SFDA/MDS reviews adverse events reported to its NCMDR and takes appropriate action to safeguard public health; and issues medical devices FSNs to warn from risks involved in continuing to use the device; and informs about the manufacturer's corrective action plan. SFDA takes the appropriate measures to ensure that the manufacturer or its authorized representative performs and closes the corrective action plan associated with such notices according to the requirements specified in this guidance document.
